OBJECTIVE

Seeking a challenging and rewarding opportunity that would enhance my career and benefit from my skills and knowledge in Enterprise Resource Planning, Cloud Computing, System Analysis and Design, Networking and Information Security.

PROFESSIONAL EXPERIENCE

Software Development Manager

April 2020 – Current

Aljoaib Holdings – Dammam, KSA

- Work very closely with the business leaders to ensure development efforts are properly prioritized and that requirements for projects are clearly defined.
- Communicate cross-functionally across various teams, ensuring clear communication amongst developers to drive development efforts.
- Understand the scope and needs of the business, contribute technically to projects via hands-on implementation, code reviews, system integrations, server configuration, and lead assigned projects to fruition.
- Support project with the best practice, risk mitigation, and issue resolution. Work with the developers to assess the impact of all changes to the platform.
- Build and work on enterprise grade software systems on top of cloud services such as Microsoft Azure and Amazon Web Services.
- Strong process and project management skills, allowing focus and successful multi-tasking in a dynamic environment on multiple software development projects.
- Collaborate with management and internal partners to implement changes to project, scope, process, or plan to resolve escalated issues, produce solutions, and ensure adherence to budgets, roadmaps, and schedules.
- Work collaboratively with team members and cross-functional team to perform impact analysis and root cause analysis.
- Assist with the design, develop, test and support of a suite of applications ranging from web applications, Android apps and iOS apps.
- Assign tasks, manage, and coordinate with software development team and track through completion to guarantee software meet requirements and delivered on schedule.
- Interview and recruit a team of highly skilled and motivated developers.
- Establish development standards for the development team to ensure proper and quality delivery.
- Plan and budget project finances based on business needs and requirements.
- Communicate with other departments and managers, on an ongoing basis, to identify any issues/concerns and ensure business continuity.

Group IT Manager

June 2018 – April 2020

International Project Developers Group – Jeddah, KSA

- Lead and direct IT operations ensuring successful delivery of services related to IT data center, networking, servers and appliances, databases, workstations, printing, mobility, voice, collaboration, site IT management and other operational services. Source and deliver components to support end user services, back end services, and specialty services.
- Manage, plan, upgrade, and staff all technical environments on a day to day basis.
- Establish asset management practices to track technological assets from purchase to disposal.

HUSAIN AL-HABOUBI

h.habboubi@gmail.com – 0504616777 – h-haboubi.com

- Design internal network for employees to share and search information housed in the database.
- Translate IT Strategy into specific initiatives and actions for a division or team and act on those initiatives to implement the IT Strategy.
- Standardize and improve troubleshooting processes with the creation of detailed computer and network configuration documentation.
- Ensure stable, ongoing configuration, break/fix support and maintenance for all supported systems and services.
- Develop workflows and processes for helpdesk technicians to improve the quality of service to employees.
- Lead ERP implementation (Oracle) from inception to successful Go Live with focus on human resource, projects, IT and finance.
- Installed, configured and migrated various email servers to Microsoft Exchange to ensure enhanced security, stability and reliable performance.
- Recruited, interviewed, and hired IT Specialists and managed a team of highly productive employees.
- Scheduled, configured and maintained network security upgrades and daily backups to Windows Server.
- Implement and enforce Disaster Recovery plans to ensure business continuity.
- Research, interact and coordinate with vendors to identify and implement the best software solutions per our technology requirements.
- Provide input on the department's annual budget requirements.

Cloud Support Associate

January 2018 – April 2018

Amazon Web Services – Dallas, USA

- Applied advanced troubleshooting techniques to provide unique solutions to customers' individual needs.
- Worked directly with Amazon Web Service architects to help reproduce and resolve customer issues.
- Installation and troubleshooting of OS Administration (Windows and Linux).
- Leveraged extensive customer support experience to provide feedback to internal AWS teams.
- Interacted with engineers from leading technology companies around the world.

Full Stack Development

January 2011 – January 2018

Self Employed – Dallas, USA

- Planned, tested, and implemented various web-based and mobile applications using JavaScript, ASP, PHP, Java and SQL
- Completed project concepts and maintained optimal workflow
- Integrated private API's to extract text from images and document and convert them to machine-usable text
- Worked on the REST based web services to send the JSON response using PHP queries for mobile applications
- Built and maintained SQL scripts, indexes, and complex queries for data analysis and extraction.
- Configured, deployed and managed Google Cloud, Azure and Amazon Web Services using Linux and Windows
- Developed an Android app that acts like an OCR scanner and generated nearly \$45,000 in profits with almost one million users worldwide

January 2010 - January 2011

- Worked for Aramco and SABIC projects for as-built drawings, quality marked check and one-line diagram
- Assisted in resolving design issues as well as generated design concepts and recommended solutions
- Planned and coordinated own work as well as produced schedules for assigned tasks

CORE COMPETENCIES

IT Operations

System Design
Networking Development, Testing & Deployment
Programming / coding
System Integration and Maintenance
Software/Hardware Installation

Management Skills

IT Planning & Implementation
Routine Reporting
Client Service and Relations
Project Management
User Guide Documentation
Presentations / Training

Personal Skills

Interpersonal Communication
Problem Solving Skills
Friendly / Relationship Building
Leadership & Teamwork
Process Improvement
Decision Making

TECHNICAL SKILLS

Computer Troubleshooting
Enterprise Resource Planning (ERP)
Database Management System (DBMS)
Systems Development Life Cycle (SDLC)
System Analysis and Design
Relational Databases
Coding
HTML
Java
Angular
Node.js
PHP

MySQL
SQL
jQuery
XML
JSON
Data Analysis
Microsoft Windows
Microsoft Dynamics
Linux
MS Office
Cloud Computing
Networking

Big Data
Oracle Fusion ERP
SAP
Microsoft Exchange Admin
Microsoft SharePoint Admin
Active Directory
Dart
Flutter
Odoo ERP
Git / GitHub / Version Control

EDUCATION

Bachelor of Science in Information Systems

University of Texas at Arlington, Arlington, Texas

December 2017

Related Coursework:

- Computer Networks and Distributed Computing
- System Analysis and Design
- Information Resources Management (ERP)
- Object-Oriented Programming
